

Varietee MAGICA 2011 thanks for the overwhelming response from it`s audiences, the 10th fabulous Varietee MAGICA show in Nov-Dec 2012 !

"Thank you for the splendid Variete Magica Show !

It is wonderful that we do not have to encumber our carbon foot prints and credit card balances with a trip to Vegas to experience high level entertainment. Its being brought right to our door step in Helsinki Finland Nov thru Dec 10th 2011.

Many people know how to perform magic tricks but the masters are few and far between.

Add to that the music, the dance, the lights, and the narration and you get a whole package that exceeds the sum of its parts; a composition that competes with those of Wagner. You simply don't see this normally in Finland. Thank you for putting in the energy for yet another show!

Varietee Magica sure is an antidote for the Finnish winter darkness; the timing is simply perfect.

Our favorite was once again, the Korean wonder worker An Ha Lim. There is something very deep in him that shines through his novel yet youthful appearance. The playing cards burst into bloom in his hands, just like a tree reveals its leaves on accelerated footage in a nature program; amazing and hypnotically beautiful. He makes time stand still. Once a master; always a master!

Juggling Tango Emily and Menno van Dyke brought sensitivity and attraction to the show; a splendid idea to merge a dramatic tango performance with an astounding juggling act.

The jocular Levent established a close and sensitive contact with the audience. He won their hearts and his nice words spoken in Finnish brought him some well earned brownie points. A skillful magician and a baffling comedian all in one package. The audience came along every inch of the way.

The director and the producer of the show as well as the master of ceremonies Timo Kulmakko was entertaining as always. His tribute to Houdini was a great move, and the trick in and of itself simply baffling.

Thank you for the splendid Varietee Magica 2011 Show ! "
